

Akal Technologies Mission

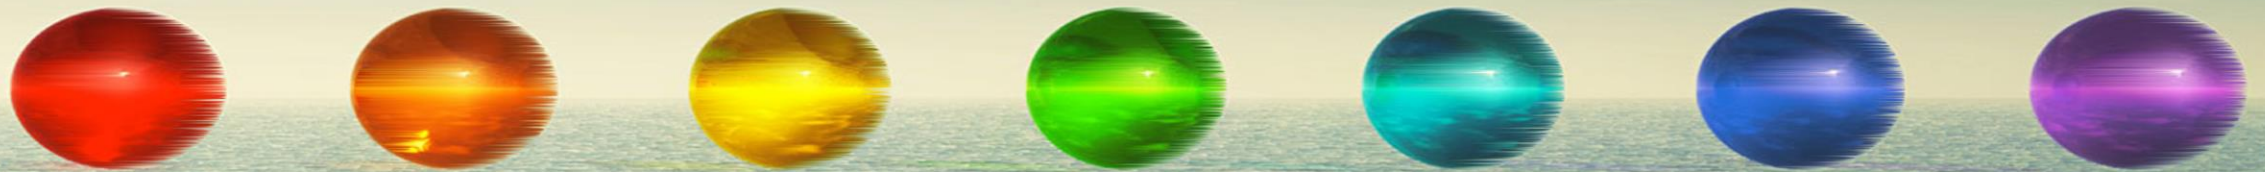

Our mission is to innovate, align and apply enhanced and emerging technologies to improve the life quality of individuals, and their productivity. The Driving force that dictates our strategic considerations is self sufficiency and individual empowerment

Footprint on the path: **You leave a footprint in the sand, and you also leave a digital footprint.** These data footprints create a digital representation of each of us. We are in a rapidly changing, data centric world.

At Akal Technologies, we apply enhanced emerging technologies, knowledge and information to enable people throughout the world, improve their quality of life and realize their full potential.

Serve the Greatest Good – “The Path”

- Using a combination of Akal Institute principles, domain expertise, bold and creative applications in technology, networking and information in morally responsible ways to improving individual lives and communities.
- We are interested in the creative use of information, applied augmented reality, artificial intelligence, and integrated software to assist, guide and enrich lives.
- We are interested in creative ways to aggregate and organize human data emissions (information) that define an individual and unlocks important possibilities for the greatest good.

Akal Technologies, transforming lives
